STERISAFE® FLEX

Disinfecting all incoming goods, prior to entering a facility, reduces the threat of exposure to coronavirus

STERISAFE® FLEX

Bacteria & viruses like COVID 19 will stay on surfaces for up to 5 days.

Now more than ever, facilities such as hospitals, care homes and offices must take extra care when receiving goods or equipment.

STERISAFE FLEX creates a secured, closed system and disinfects everything that can fit in the container, via the STERISAFE PRO robot.

STERISAFE® FLEX

Contact us to find out how STERISAFE FLEX could provide you with a fast and secure solution for temporary or permanent use.

Available for short or long
term leasing tailored to meet
your needs
